

## **Postdoctoral Position at the University of Missouri-Columbia**

A postdoctoral position is available at the Dalton Cardiovascular Research Center, University of Missouri-Columbia to conduct NIH-funded research on vascular remodeling. The successful candidate will use state-of-the-art techniques including intravital, multiphoton, and atomic force microscopy to investigate the mechanisms responsible for controlling the remodeling process in intact animals, pressurized microvessels and isolated cells. Applicants must hold a doctoral degree (PhD, MD, DVM), and preferably have background experience in cardiovascular physiology, bioengineering or biophysics. The position will remain open until filled. A commitment of at least two years is required. Salary and Benefits will be commensurate with experience and in accordance with NIH guidelines. To apply submit a letter including research interest, career goals, current curriculum vitae, and the names and contact information of three professional references to Luis A. Martinez-Lemus, DVM, PhD, Dalton Cardiovascular Research Center, University of Missouri-Columbia, 134 research Park dr. Columbia, MO 65211. Email: [martinezlemusl@missouri.edu](mailto:martinezlemusl@missouri.edu).
