

Postdocs at USF Tampa Bay

Postdoctoral positions are available at the Department of Molecular Physiology & Pharmacology to investigate the signaling and molecular mechanisms in regulating microvascular barrier function in health and disease. Current research approaches include intravital microscopy, isolated microvessels, fluorescence microscopic imaging, and state-of-the-art molecular biology techniques. Require doctoral degree in related areas. Experience with microcirculation research, endothelial cell molecular biology, or microscopic imaging is preferred. Send CV and contact information of three references to:

Sarah Yuan, MD, PhD
Professor and Chair
